***Allowable Subject Matter***

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 1-13 and 17-28 are found to be in condition for allowance.

***Reasons for Allowance***

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a method of analyzing motion between adjacent fields of an interlaced video signal, comprising the steps of vertically interpolating one or both of the fields to produce respective signals for the two fields which correspond in vertical position, subtracting the signals to provide a field difference signal, and removing a component in the field difference signal which arises from vertical detail.

It is noted that the closest prior art of record (Boie US Patent no. 5,444,493) teaches a motion analysis method, however, Boie fails to particularly teach or suggest *"vertically interpolating one or both of the fields to produce respective signals for the two fields which correspond in vertical position, subtracting the signals to provide a field difference signal, and removing a component in the field difference signal which arises from vertical detail"* as specified in the claims.

**Conclusion**

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
